

MaritiQ

MaritiQ GmbH Presentation 2025

MaritiQ

MaritiQ GmbH is a Germany-based marine technical service provider that delivers end-to-end project management, site supervision, certified repair crews and operational support-covering structural, mechanical and full electro-technical scopes. Whether your vessel is in dry-dock, alongside the quay, or under way, we engineer, install and commission class-approved LV/HV and fibre-optic systems alongside our established steel and pipe repair services, ensuring high-quality, IACS-compliant solutions with minimal disruption to operations.

Our multidisciplinary team-Chief Engineers, Captains, Vessel Superintendents, Electrical Designers, Marine Electricians, Welders and Metalworkers-has completed 60+ electrical retrofits (scrubbers, BWTS, flow-meters, VFDs, CCTV) and more than 20 shipyard projects across Europe, Asia, the Americas and the Middle East, combining practical field insight with precise coordination at every stage of your project.

Project Management

MaritiQ

We provide full-cycle project control and documentation:

- Scope definition, budgeting, and contract negotiation
- Stakeholder coordination (client, class, shipyard)
- Scheduling, risk mitigation, and change management
- Final documentation and post-project evaluation

* Detailed service description will be provided along with Tariff Rates on request.

Project Superintendency

MaritiQ

Our experienced Superintendents are on-site to:

- Oversee technical works in drydock or afloat
- Interface with class, contractors, and shipyard staff
- Enforce quality, safety, and schedule compliance
- Resolve operational issues on the spot and track daily progress

* Detailed service description will be provided along with Tariff Rates on request.

Surveys and Inspections

MaritiQ

We support shipowners, operators, and managers through:

- Pre-purchase and condition surveys
- On-Hire / Off-Hire inspections
- Pre-audit checks (PSC, ISM, ISPS, MLC, USCG/VGP, Flag, Nav. Ass., SIRE)
- Owners and Insurance Inspections
- Damage assessments and technical reporting

* Detailed service description will be provided along with Tariff Rates on request.

Electro-Technical Services

MaritiQ

Our Team of Electrical Engineers and Mechanics provide full-cycle project control and documentation:

- Turn-key electrical installations – from cable routing to switchboard tie-in.
- Fiber-optic cable laying, splicing & OTDR testing.
- Electrical material & equipment supply (class-approved).
- Project supervision & commissioning – onboard or yard.
- 24/7 technical support & troubleshooting.
- 60 + ship retrofits – scrubbers, BWTS, fuel systems upgrades.

* Detailed service description will be provided along with Tariff Rates on request.

Certified Welders, Fitters & Locksmiths

MaritiQ

Class-approved welders, skilled fitters and locksmiths for:

- Structural steel and pipe renewals
- Machinery and outfitting jobs
- Voyage or emergency repairs
- Certification: TIG, SMAW, OFW, IACS, ISO 9606

* Detailed service description will be provided along with Tariff Rates on request.

Contacts

MaritiQ

We welcome inquiries, vessel assignments, framework agreements, and new partnerships. Whether it's a full drydock or riding repair team, MaritiQ GmbH delivers safe, structured, and class-compliant solutions.
